Brief of Masterpiece

Name: Abdullah Maqableh

Name of Project: Offers

The Website is a user guide in the market by informing the user where the best place to buy anything is so that if the user wants to inquire about clothes in a specific market.

He can see clothing stores in this market, the site also provides the user's favorite offers.

It also provides a special page for store owners to download their offers and products.

Sections of the site are:

1) A login page for the average user and a page for shop owners
2) A section to search for a specific category within a specific market
3) Categories
4) Comments for each post
5) A page for store owners that allows them to publish their offers and products

The main goal of the project is to save time for the user

And get the best offers

Technology used:

1) React JS
2) Laravel (MVC)
3) MySQL
